SESSIONS. Below is a list of closing topics chosen by the Group.

Past Topics: AudioVideo: music recording, organization, indexing, playing &, smart speakers. Artificial Intelligence: recognising sounds & places, future uses. E-Books, newspapers & magazines – access via Library E-mail: attachments, contact groups, folders, Thunderbird & Windows10 Mail General: browsers savings and best-buys. Hybrid (Zoom with actual) meetings. Photos. Presentations. Google Apps: Photos > Drive & Docs for text scans into editable documents. Health: scams. cookies, passwords, protection, system-restore, faster computers. Organisation of files, back-up methods, address labels. Other Apps: best 24 free, my favourites, maps. MS Word & Publisher. Photo enhancing. Storage: disks, sticks, cards, external drive, clouds & sharing. GDPR. Windows10: Edge browser, security, keyboard short-cuts, multi-clipboard. YouTube: favourite clips, download

Future Programme: open to all U3A members interested. We now start each session with helping out those with burning problems, leaving the last half-hour or so for general discussion or presentation of a chosen topic. This enables those not interested in the topic to leave early or continue to rectify their own problem. Topics, of general interest chosen at our last planning meeting, formed our summer progamme:

> Family Communications discussion. Print-Scan-Copy-ers. Music from CDs etc. Favourite Apps. Presentations. Photo Enhancing

But our May meeting attendance dropped dramatically: several members needed to attend other Groups offering summer visits. So those present decided that it was not economic to continue during the summer, as last year, but to start again in October. We will decide then on the above subjects and others for our winter program.

Other Activities:

IntroTour of Your New Computer. This involves your attendance at a meeting to down-load a set of files through your USB port, these guide you through the tour

Basics Course (laptop, tablet and phone). Small groups could be arranged as required to assist with basic topics such as Internet, E-mails, Memory, Photos, Music, Maps, Apps, Office Software, etc. Contact the Group helpers if interested.
